With up to one in three children struggling with anxiety in this country, overwhelmed adults require a new approach as well as a practical and easy-to-implement toolkit of strategies that work. In the time of COVID19, and the subsequent societal changes, anxiety has become ever-present in students of all ages. It is probable that during a pandemic that heavily impacts everyday life, levels of anxiety in children and teens are even higher, and the possibility of subsequent trauma greater. Through the use of case studies, humorous stories, and examples of everyday challenging situations, participants will learn easy to implement preventive tools, strategies, and interventions for reducing anxiety, increasing self-regulation, accurate thinking, and self-monitoring in students. Virtual classroom and traditional classroom examples will be shared.

THIS IS A PRACTICAL STRATEGIES SEMINAR! During this interactive training, participants will take away functional ideas and tools (applicable for K-12th grade) that can be used right away to support their students. These tools will help them (and you) be more calm, connected, and confident.

WHO SHOULD ATTEND?

Special Education teachers, Speech-Language Therapists, OTs, counselors, general education teachers, administrators, psychologists, psychiatrists, social workers, PTs, principals, nurses, parents.
