On Demand: Improving Organizational Skills for Physical & Digital Space

SPEAKER: SARAH WARD, M.S., CCC-SLP

Independent Self Study Course

COURSE DESCRIPTION

Times are changing in education. On one hand, classrooms are moving away from paper, with students managing assignments, homework, and reading materials online. Now, assignments are posted digitally rather than written down, and work is submitted online instead of being physically handed in. On the other hand, there is also a push for students to use fewer devices in the classroom, favoring physical materials instead. Yet, cluttered desks, misplaced items, loose papers, and missing books can make it difficult for students to find what they need quickly and stay engaged in their work. Disorganization can make it challenging for students to access their books and materials between classes.

Similarly, a student's study space at school or home may be cluttered with distractions, making it harder to focus and complete assignments efficiently. While physical disorganization is easy to spot, these issues often mirror what's happening digitally.

In this lecture, Sarah will offer an executive-function-focused approach to teaching students how to develop effective physical and digital organization habits independently. Lecture, powerpoint and case examples will be shared.

WHO SHOULD ATTEND?

Special educators, Speech Language Therapists, Occupational Therapists, General Educators, Academic Coaches, ADHD coaches, Psychologists and anyone supporting students with executive function support needs. This is an intermediate level course and no prerequisites are required. Grade levels 5-12 and post-secondary.

Improving Organizational Skills for Physical & Digital Space

SPEAKER: SARAH WARD, M.S., CCC-SLP

ADDITIONAL COURSE INFORMATION

Common Digital Disorganization:

Unsorted Digital Files: Files saved haphazardly on devices or cloud storage are hard to locate when needed.

Email Overload: An inbox full of unread or disorganized emails can lead to missed assignments, deadlines, and teacher communications.

Lack of Digital Calendars/Planners: Not using digital tools to track assignments, tests, and activities can result in forgotten or late submissions.

Scattered Notes and Assignments: Notes spread across multiple apps or devices make it difficult to review and consolidate information for studying.

Random File Naming: Students might name files vaguely, making it hard to identify contents later. Important files can be hard to retrieve because names don't reflect what's inside.

Cluttered Digital Spaces: Saving files directly to the desktop or downloads folder without using folders or subfolders creates a jumbled digital workspace.

Forgotten Locations: Files saved without logical organization make it easy to forget where they're stored, making even search functions less effective.

LEARNER OBJECTIVES:

1. Identify key executive function challenges—such as sustained attention, working memory, and flexible thinking—that hinder students' ability to maintain organized physical and digital spaces, exploring how these challenges can be managed through learning the HOW and not just a one size fits all system.
2. Demonstrate actionable, step-by-step routines for establishing sustainable organizational habits in both physical and digital environments, focusing on the process of internalizing the organizational skill as regular, self-directed practices rather than one-time solutions.
3. Develop personalized strategies with students to structure their digital and physical spaces, guiding them through the processes and how of file naming, folder organization, and planner usage to make these actions automatic and supportive of working memory and task management.
4. Apply executive function skills, such as selective attention and prioritization, to manage email overload and digital clutter, teaching students practical routines to filter, sort, and sustain focus on essential information for effective time management.
5. Support educators and families in fostering students' self-monitoring and self-reflection skills, providing a gradual roadmap to help students internalize responsibility for their organization, and turning strategies into sustainable routines that foster independence.

Improving Organizational Skills for Physical & Digital Space

SPEAKER: SARAH WARD, M.S., CCC-SLP

COURSE OUTLINE

15 minutes: Understanding executive function skills and how it impacts physical and digital organization

- Common struggles: cluttered desks, misplaced materials, missing books, etc.
- Discussion: Observing patterns in physical disorganization and its impact on engagement and focus.

70 minutes: Tips - Creating sustainable physical organization routines.

85 minutes: Tackling Digital Disorganization

- Key digital challenges: unsorted files, email overload, scattered notes, cluttered desktops.
- Strategies: File naming conventions, folder structures, and digital planner/calendar use.
- Activity: Develop a personalized routine for physical or digital organization.

10 minutes: Conclusions & Wrap-Up

SARAH WARD, M.S., CCC-SLP

Sarah Ward has over 25 years of experience in diagnostic evaluations, treatment and case management of children, adolescents and adults with language learning disabilities, nonverbal learning disabilities, attention deficit disorder, executive dysfunction and social pragmatics. Her particular specialty is in the assessment and treatment of executive function deficits. Ms. Ward holds a faculty appointment at the Massachusetts General Hospital Institute of Health Professions where she provides instruction to graduate level students in the assessment and treatment of individuals with traumatic brain injury and other cognitive communication disorders. A popular speaker, Sarah regularly presents nationally and internationally on the topic of executive functions to a variety of professional and parent organizations, school and lay groups. She has presented to and consulted with over 450 public and private schools in Massachusetts and across the United States. Awards received include the MGH Expertise in Clinical Practice Award, the Distinguished Alumni Award and the Faculty in Excellence Award from the Massachusetts General Hospital Institute of Health Professions (2002, 2011).

Disclosure: Sarah Ward's company Cognitive Connections produces and sells products on her website, which are tools, that support students in developing an internal sense of time. Some of these materials will be referenced in the presentation. Many of these materials can also be purchased at local stores. The website also sells treatment programs and games to develop independent executive function skills. In addition, the website offers many free resources and references. Sarah Ward receives a speaker's fee for presentations. There are no non-financial relationship to disclose.
